LEASE-LEND CRISIS **Burdens to Fall on Working Class**

By TED GRANT

THE AMERICAN CAPITALISTS HAVE ABRUPTLY AND RUDELY, WITHOUT CONSULTATION OR WARNING, ENDED LEND-LEASE. THE SUGARY PHRASES ABOUT "CO-OPERATION" IN THE GREAT "BATTLE OF DEMOCRACY" IS SHOWN TO HAVE BEEN BUT A COVER FOR THE REAL INTERESTS OF IMPERIALISM.

> No sooner had Germany and Japan been knocked out, than the scramble for the markets of the world has been intensified among the Allied victors.

> Despite the official lies about the reasons for Lend Lease, it was only granted in the first place by the Americans after they had stripped British imperialism of the major part of her investments, markets and interests abroad.

The whole of the press unanimously bleats about the difficult position in which British imperialism finds itself. When the capitalist politicians and

their Labour and Stalinist lackeys were

painting a glowing picture of the glor-ious vistas of plenty and prosperity which would follow the victory of the Allies, the "Socialist Appeal" warned the workers that Britain, though nom-

Captain L. D. Gammans:

SOLDIERS ANGRY **Government Holds Up Demobilisation**

- WRITTEN BY A SOLDIER ON LEAVE FROM MIDDLE EAST SINCE THE CAPITULATION OF GERMANY, THE QUESTION OF DEMOBILISATION HAS BEEN FOREMOST IN THE MINDS OF EVERY MAN AND WOMAN IN THE FORCES. THERE IS ONE TOPIC OF CONVERSATION IN EVERY UNIT, EVERY CAMP, EVERY BARRACK ROOM: "HOW SOON DO WE GET OUT OF THIS RACKET ?"

The soldiers, sailors and airmen have watched with disgust the slow and trickle through the Demob meagre Centres of the first few release groups. Everywhere it was known that the Demob Centres, capable of handling 1,400 men a day, were in fact dealing with less than a quarter of that numand soldiers pinned their hopes on the improvement that would follow the advent of a Labour Government. Less than one month after the Lab-our Government took office this illusion

was rudely shattered.

On August 22, Attlee made the pro-nouncement that a million men were to be released by the end of the year. The following day George Isaacs, Min-ister for Labour and National Services, announced that **Group 23** would be de mobilised by December 1945. Simul-taneously, the War Office officially taneously, the War Office officially stated that Group 23 would be released between December 24th and January 20th, an even more conservative esti-mate than that of Mr. Isaacs. In other words, the present farce of de-mobilisation, the miserable trickle of war weary veterans through the Demob Centres is to continue, despite Lab-our's election pledges as to the speed up of demobilisation.

Every soldier, seilor or airman, at home or overseas, knows full well that the service chiefs have fought hard to keep the rate of release at its present snail-slow tempo. The reason is not far to seek:---the rank, and therefore the pay of these senior officers depends upon Establishments. If Establish-ments are revised it will mean a reduction of hundreds of high ranking officers to a lower rank—such people will hardly be among those to advocate a speedier demobilisation.

Any solider from the Middle East, Parforce or C.M.F. knows of the enor-mous administrative units that are being maintained in idleness in these commands. He knows that unnecessary work is being invented, rather than allow Establishments to be reduced. mands have become redundant.

The workers in uniform have, in the past, blamed the officer caste and their Conservative friends in Churchill's Government for the slow rate of de-mobilisation. But they pinned their faith on the Labour Ministers to make a clean-up of these Establishments and speed demobilisation accordingly. is not surprising that the recent pro-onuncements have raised a storm a storm that will gather force. Already the M.P.'s and the press have been mundated with correspondence from service people-the soldiers and airmen at Gibraltar have demonstrated in no uncertain manner their dissatisfaction with the so-called "speed-up'

The Labour leaders protest that "the Government's policy as stated in the House of Commons, is to secure the maximum speed-up in demobilisation consistent with our military commitments and fairness to all who have served". This protest will not deceive man or woman capable of the most elementary understanding of arith-" Our milikary commitments have been estimated at 500,000. At the end of the war in Germany, there were some 5 millions in the armed forces If a million are to be released by the close of 1945, a surplus of three and a quarter million will remain.

Why does the Labour Government propose to maintain this enormous Let Mr. Attlee answer this orce?

They must insist on the demobilisation **now** of all redundant personnel. They must insist on the withdrawal of the armies from the Far East, from Europe and from all countries now occupied by British imperialism.

In no uncertain terms they must let Mr. Attlee and his Caibnet see that the working class have no interest in the preservation of British Imperialism and no intention of being used as strike breakers of the European Revolution.

The "Observer" of August 26th,] port an equivalent value. Our excomplains in its editorial columns: ports were only £530,000,000.

The difference was made up partly y the interest on those foreign by investments made by our Victorian and Edwardian ancestors; partly by the profits of British shipping companies, which carried not only Erit-ish but foreign goods all over the world; and partly by the insurance business and other similar activities which resulted from the fact that the City of London was the financial centre of the world. Even with these "invisible ex-

ports" we were not breaking even before the war, and were starting to live on our capital abroad to make up the difference.

Since 1939 our economic position has deteriorated catastrophically in four respects:

(a) Most of our export trade has been sacrificed to the war. In the meantime some of our best customers have learnt to make for themselves the things they previously bought from us. (b) A large part of our overseas

investments were liquidated in the early part of the war, when the U.S.A. was prepared to HERBERT BELL supply us only on a "cash-and-carry" basis.

(c) We are now a debtor nation lors at Newbiggin. and owe the staggering sum of more than £3,500,000,000. "There are plenty of people in Berlin trying to sustain life on no more than a slice or two of dry bread a day. There are women who take to the streets and offer themselves with a kind of casual hopelessness to anybody who cares to give them a few scraps of food . . ."

"The Berlin district of Charlottenburg in the British zone has an esti-mated present population of 168,000. The week before last, milk distribution in Charlottenburg averaged 1,800 pints

continue." In these simple words a correspond-ent of the "Manchester Guardian" sums up the condition of the people of Berlin today. Every day the press carries similar reports from all parts of Germany. Even the capitalist of Germany. Even the capitalist journalists, who yesterday were gloat-ing over the complete collapse of that country, are horrified by the results. The "Daily Herald" (24.8.45) re-

ports: "I saw at the Stettiner Station (Berlin) miserable remnants of humanity, with death already shining out of their eyes-with that awful, wide-eyed stare. Four were dead already, another five or six were lying alongside them, given up as hopeless by the doctor, and just being allowed to die. The rest sat or lay about, whimpering, crying or just waiting, hanging on to the slenderest hope that something,

somehow, sometime would be done for them. They are past helping themseives

'They have no money, no valuables, nothing with which they can barter or buy a crust of bread. And the mother's only thought is food for the children. I spoke to many. One woman, emaci-ated, with dark rings under her eyes and sores breaking out all over her face, could only mutter self-condemnation because she was unable to feed her two whimpering babies. I watched her trying desperately to force milk from her milkless breasts-a pitiful effort that only left her crying at her failure. .

'In a closed cattle truck were the dead and dying, removed each night to make room for more who were certain to be on the next train to arrive."

at the time of writing, have been won because of the Sunday strike movement commenced by the workers in the Liverpool area, and which threatened to engulf the country.

As it is, 12 days holiday has been conceded to commence in 1946. But the Union repersentatives have agreed day strikes were against the abolition that if manpower doesn't allow for relief, a week only will be taken and an extra week's pay made. The wage mercases amount to 7s. on the adult minimum wages and, as far as can be gathered, the differential adjustments on the wages of other grades will result in some cases in more than 7s. being given.

The Union programmes set out to abolish payment according to rural and industrial areas, but in the new agree ments concluded without any test of the feeling of the workers, **this method** of payment emerges intact. The mini-mum rates will now be 84s. rural, 85s. industrial, and 87s. London. These are omposite rates, inclusive of war wage with a certain portion now consolidated nto the base rates.

Wherever Union representatives pre-sent themselves today and the closer they get to the workers on the job, the more hostile their reception. Most of them triumphantly flaunt the results of the negotiations as a wonderful achievement. The fact that the NUR programme calls for a 90s. minimum as a base rate, doesn't seem to worry them very much. They go into the negotiations not with the object of fighting for the programme, but for as much as they can get without trouble and without impairing their jobs.

Mr. E. G. Bowers, speaking to the August meeting of the London D.C. of the NUR in his capacity as London E.C. member, disclosed that represent-atives of the companies had stated the Labour Government was opposed to further increases for rail workers until after 1946. Mr. Isaacs the new Labour Minister denied this when confronted by the N.U.R. representatives. Mr. Bowers was peeved that the R.C.A. and A.S.L.E.&F. went on with negotiations in their absence.

Mr. Bowers met with bitter oppos-

workers. He proclaimed that the Sun-day strikes were against the abolition of a Sunday turn, and not originally for the programme. The extent to which he cannot see the link-up, is a measure of the extent to which union officials not dependent on rail wages for many years, are removed from the conditions of the workers. Under the existing circumstances with wages so low, curtailment of Sunday work means reducing living standards. Hence the ink-up at Liverpool.

The cutting down of Sunday work, consequent upon the curtailment of war traffic sharpens the necessity for a steep uprising in basic wage rates. If the Union officials think the present settlement is sufficient they have another think coming.

Any insistence on the part of the rall workers for a fair share of the nation's resources is to be dressed up as "staobing the Labour Government in the back". If the presence of a Labour Government is to be any advantage to

the rail workers, who gave generously of time and trade union funds in assisting it to power, it must be forced to nationalise transport, without compensation, and hand over control to the elected representatives of the workers and the technicians.

To turn the Unions into fighting organisations, it is necessary to re-capture them for the members by ensuring the election of all officials every two years and paying them railwaymen's wages

The Edge Hill (Liverpool) Branch of the Associated Society of Locomotive Engineers and Firemen have given a lead on this. The Branch passed a resolution expressing no confidence in their executive committee and called for a recall of the annual assembly of delegates to discuss the advisability of removing them from office.

Dear Comrade.

Thanks a lot for the papers and mags

Great decisions are expected from the Labour Government such as speedy demobilisation, something concrete in housing and jobs. "The old gang has gone," they say. Grigg, the ex-secretary of State for War has to the delight of everyone here got kicked

My two "wall newspapers" are going quite well. Last week another incident happened in relation to them. The Orderly Officer, a newcomer, wanted to know who looked after them. He was instrumental in getting the boards torn down from the wall. I was sent for by my Company commander and told my cuttings were too one-sided. When I explained that I was before the CO on the same theme, and given the option of discontinuing the job or putting forward **right** and **left** opinons, I was told to carry on !

At the moment I am out doing exercises and as there are no news-papers I started another "wall newspaper' nailed to a tree-and its success was a foregone conclusion.

EDITORIAL Labour's Foreign Policy

EVIN'S speech on foreign policy in the House of Commons on August 20th demonstrates that the Labour leaders intend as far as possible to maintain, unchanged, the policy of their Tory predecessors. So far as Bevin & Co. are concerned the General Election might never have taken place. The decisive rejection of Tory capitalist policy both at home and abroad by the masses is thus cynically flouted by the Labour leaders who claim to speak in their name.

The "Daily Express", organ of Lord Beaverbrook reports the scene in the House with gratification :

"For it was all a case of Mr. Bevin looking across to the late Foreign Secretary, Mr. Eden, and saving, 'I always agreed with him.'

And later, of Mr. Eden looking over to Mr. Bevin and saving, 'I cannot recall any important issue of foreign politics on which we differed in four years in the War Cabinet.

I hope I do not embarrass Mr. Bevin by saying so '."

Churchill, arch representative of Toryism approved wholeheartedly of Bevin's speech. He would not have made any different speech.

Bevin made a justified criticism of the totalitarian puppet Governments estabilshed by Stalin in the Balkans. He showed the farce of the so-called "democratic elections" conducted under "the auspices" of the G.P.U.

But this criticism was not at all motivated by Bevin's love of democracy or free, democratic elections. In this too, there was "continuity" of Tory policy. It was because these elections were dominated by the Soviet bureaucracy, rather than by British imperialism, that Bevin made these remarkable discoveries. We notice, for example, that for India and the colonies, Bevin evinces no great zeal to ensure democratic elections and the free choice of representatives elected by the people. In relation to Hong Kong, Bevin says in effect : What we have, we hold. In the same way, the Soviet bureaucrats, who are "managing" the elections in the Balkans, when the British imperialists did not see eye to eye with them at San Francisco, discovered that India was not an independent country.

In line with the policy of British imperialism Bevin condemned the annexation by Poland of too large stretches of Eastern Germany. This is not at all because Bevin is opposed to annexations. But because of his imperialist masters' desire to curtail Russia's sphere of influence in Central Europe. He stands four square for the peace of revenge against the German people.

The hypocrisy of Bevin's position was shown by his attitude towards Greece and Spain. He supported, in retrospect, the criminal war of intervention of British imperialism against the Greek people. He openly supported the counter-revolutionary Government of Vulgaris. Here apparently, it is not a question of standing out and assuring the restoration of democracy. This became even clearer with Bevin's remarks on the Fascist, Franco. Here Bevin said : "The regime in Spain is one for the Spanish people to decide. Any intervention by a foreign power would have the effect of probably strengthening General Franco's position." Thus, Bevin is quite prepared to wave the big stick in the Balkans but in Spain, merely to wag his finger. Both policies, curiously enough, coincide with the interests of British imperialism.

Reports from reliable sources indicate that even within the ranks of the Labour M.P.s there is tremendous dissatisfaction and discontent. The most honest and sincere members are utterly disgusted with the reactionary anti-socialist policy put forward in their name. If this is the attitude in the House, the feeling in the Trade Union Branches and the Labour movement generally, can the bosses and government!" and the steady fall in the standard of living "Down with 'national unity' and of the workers, the outstanding dewell be visualised.

Zionist Conference Lease-Lend

BY C. R. BROOKS

The acceptance of the Biltmore Programme by the recent world Zionist Conference, held in London during the first two weeks of August, was a distorted reflection of the deep

crisis facing Jewry.

ZIONISM

The Biltmore-Jerusalem Programme 1942 endorsed by the Conference called for unlimited Jewish immigra-tion into Palestine under the control of the Jewish agency, and the estab-lishment of a Jewish Commonwealth.

declaration which included the following demands:

"That the reparations in kind from Germany be granted to the Jewish people for the upbuilding of Palestine, and—as a first instalment—all the German property in Palestine be used for the re-settlement of Jews from Europe."

It is incontestable that the Jewish It is moontestable that the Jewish masses in Europe have suffered un-precedented torture and degradation since the advent of Hitler, and parti-cularly during the war years. The Zionist programme offers itself as a solution to the problems confronting solution to the problems confronting Jewry and as a guarantee against further tragedy.

The Revisionists, adherents of the late Jabotinsky, are the most energetic proponents of a military struggle for the conquest of Palestine and are rabidly anti-Arab. The argency of the Jewish problem has thus driven the Zionist movement

has thus driven the Zionist movement further along the road of exclusive nationalism. The old Weitzman leadnationalism. ership only managed to maintain itself albeit with a strong infusion of the Silver tendency, by the return of a Labour Government in Britain. As is known, the Labour Party has not com-mitted itself to the White Paper in nutted itself to the White raper in Palestine. The Conference still places some hopes in the Labour Government for a pro-Zionist Palestine policy. It therefore hesitated to overthrow the Weitzman leadership which hopes to achieve its programme by negotiations with the British Government.

The general mood of the Conference was to achieve as much as possible through the Weitzman leadership, to subject it to pressure from the Silver Group and to maintain friendly re-lations with the "Revisionists" as a threat, should Weitzman's efforts prove Nazi tyrants in order the better to fruitless

BRITAIN'S INTEREST IN PALESTINE

In their deliberations, the Zionist leaders completely ignored the real basis of British interest in Palestine. For British imperialism Palestine shment of a Jewish Commonwealtn. The Conference also issues a political first place a necessary link between the Metropolitan country and subject India. Secondly, it is a base for Brit-ish domination of the Middle East. In the interest of the oil companies and of British trade. This is the real reason why Britain, with a Labour Government or a Tory Government in power, cannot and will not give up her stranglehold on Palestine. This is the reason why Britain subjugates the

masses and represses any movement towards national independence on the part of the Arab people. Ignoring these fundamental facts, the leaders of the Zionist movement delude their supporters with hopes that Britain will assist in the establishment of an independent Jewish state in Palestine. British imperialism, according In this connection, it is significant to the needs of the moment, makes o note that the Hashomir Hatzair and use, first of the Arabs then of the state in Palestine would in mediately arouse the justified opposition of the Arab peoples and embroil the Jewish masses in a new slaughter. They would find themselves the unwitting tools and victims of British imperialism's interests. Even if the Jewish state were proclaimed, this state would look nothing like the "Promised Land" of nothing like the From would be an the Zionist prophets. It would be an impotent puppet of British imperial-ism in a desert of Arab hostility. It ism in a desert of Arab hostility. It ever, that British imperialism will embark upon such an ill-fated adventure with the inevitable dangers of stirring

up a gigantic anti-imperialist move-ment in the Middle East. Those Zionists who comfort them-selves with the illusion of benevolent

American intervention are likewise de luding themselves. American concern for the Jews in Palestine is only a cover for the very real material interests of the American oil barons who covet British loot. If the Zionist novement can be used to embarrass their British rivals, the American im-perialists will use Zionism. Their in-tervention does not go beyond this point.

THE ONLY ROAD FOR JEWRY carry out its programme of enslave-

ment in Germany. Dr. Weitzman adds his quota to the general stream of chauvinistic abuse. He said: America and other areas. American imperialism which has enormously expanded production in the war years in fact doubled it_intends to force her way into the British Empire and the

"I make no difference between the Germans and the Nazis. They are all directly and indirectly responsible for what has happened to the Jews and we will not forget it."

He was followed by two represent tives of the Jewish Brigade who bitterly assured their listeners that they found nothing but hatred in thei hearts for all Germans. They further distinguished themselves by opposing the lifting of the non-Fraternisation in Germany. Thus, the people who should have learned more than anyone else that no nation is responsible for the crimes of its rulers, went on record as the most rabid exponents of a policy of race hatred, identical in all its essentials with Hitler's programme against the Jews.

While it is true that the Jewish masses have suffered untold misery, in this they are by no means alone. Europe's millions have likewise suffer-ed and are still writering the terrible ed and are still suffering the terrible consequences of an outworn system Capitalism in decline capable only of stripping the masses of all material, social and cultural gains of a century of struggle.

The tragedy of the Jews is therefore, part and parcel of the trag-edy of society in general and can only be solved in concert with the problems that confront the oppressed peoples. Zionism diverts the aims and energies of the Jews from their real interests and from the real struggle. It offers them the consolation of a utopian destiny and national existence.

Intelligent Jewish workers will turn with disgust from the intrigues of Zionism and will find their place in the general struggle for democratic rights in the building of a Socialist movement and for the overthrow of the capitalist system.

The Jewish population in Palestine must likewise find its place in the struggle for national independence, and in doing so it must finish with its position of Jewish exclusiveness and fuse with the Arab masses industrially and politically. Instead of demanding German reparations in kind from the British imperialists, it must join with the Arab masses and demand that British imperialism clear out of Palestine and leave its inhabitants to decide their own fate in a spirit of fraternal co-operation.

In order to maintain a fairly stable base against Russia. America will keep Britain going. But only on rations, like Britain rations her colonies or nore modern technique and thus greater productivity of labour. At best, even if the British manage to patch up some sort of compromise with the grasping financial overlords of America, the outlook for the masses is indeed a bleak one. The whole of the press, including the ike Britain rations her colonies or semi-colonies.

To try and solve this problem on a capitalist basis is hopeless. It can only mean further misery and insecurity for the masses in Britain and throughout the world. It will solve nothing, even if the masses surrendered to the blackmail of the capitalists. It could not alter the declining position of British imperialism. A trade war, with or without agreement with America, is still inevitable because of the monstrous contradictions between increased productivity and the purchasing power of the masses. It can only prepare the way for a new world-wide slump which will make the slump of 1929-1933 seem the height of prosperity.

Let the Labour leaders take warn-The masses voted Labour in ing. power because they wanted a sharp break with the old rotten system of capitalist exploitation. If the Labour leaders took real measures against the capitalists, the crisis could be overcome. When the Labour leaders in Russia were in power after the first revolution of February 1917, the same Wall Street and the same City of London exerted pressure upon them to tread the path of "continuity of policy" of capitalism. This resulted in chaos and misery for the Russian masses. But the Bolsheviks made a clean break when the Labour leaders failed and they seized control. They took over the land, the mines, banks, factories, the railways-without com pensation to the capitalists and placed them under the control of the working class. Even a backward country like Russia with its feeble industrial economy achieved marvels on this basis. Britain would achieve even greater marvels. This is the road out in the interests of the workers.

The Labour leaders are capitulating to the blackmail of Big Finance. This is the road to disaster. As Lenin said: Either with capital or with the working masses: there is no middle road. Through the Local Labour Parties and Trade Union Branches and mass meetings the workers must demand real measures against the cap-italists.

The only road out lies in working lass internationalism. Capitalism has turned the world into a mad-house of conflicting economic rivalries, state boundaries, tariff walls, culminating in military conflicts. On the basis of a decisive stand against capitalism in Britain, the workers could appeal to the European, Asiatic and the Ameri-can masses to assist them in a joint plan of building a new world of social-ist peace and plenty on the basis of a socialist planned economy.

Sacrifices in the interests of a plan-ned socialist economy would be worth while because they would rapidly guarantee a rising standard of living on the basis of an abundance of goods produced in the interests of the many and not for the profit of the few. Demand the Labour leaders take act-

The depth of the crisis can be seen from the fact that the Ruhr produced, during the first three months of Allied occupation, only a little more than one-tenth of its nor-mal output of hard coal. Mr. Harold Ickes, U.S. Secretary of the Interior, wasmoved to say on July 20th that wasmoved to say on July 20th. that "the race in Europe is one between coal and anarchy.

DRIVE AGAINST GERMAN MINERS

So serious is the position that articles in such responsible papers as the "Economist" and "Manchester Guardian" have quite seriously proposed the mass employment of human posed the mass employment of human muscle-power, through a system of cycles seating 20-30 men, in order to pull the trains for which coal is lack-ing! It is a tragic symbol of the de-generation of capitalism, which built up michtr industries on a foundation up mighty industries on a foundation of coal, that capitalist Europe should be facing ruin and collapse into pre-historic conditions for lack of this com-

We have said that the major responsibility for these conditions lies on Allied policy, in particular their policy Allied policy, in particular their policy towards Germany. It contains not a single constructive idea: its one aim has been **destruction**, politically and economically. Economically, the policy of refusing all material aid for Germany means that the coal problem cannot be solved. Starving masses cannot produce. Draconic laws against absentees are being threatened including eviction of miners from their houses. withdrawal of supplementary ration cards, and courts martial (a glorified Essential Work Order). But they will he no more successful there than they were in this country, or in German-occupied countries: the miners stay away in order to repair their shattered homes and search for food for their starving families. And the will to work is further destroyed by the Allied policy of retaining the Nazi managing personnel intact in the mines.

But many of those who were saying, "the Germans deserve it", are beginning to And those who really deserve to pay for the crimes of Nazism, receive Allied protection: but those who suffer, are the workers and lower middle class, and above all their children. But the problem is not that of Germany alone. The shadow of famine and unemployment hangs over the whole of Europe. The Allied policy of destroying and stifling German production spells ruin for all the countries of Europe.

It is the duty of the British workingclass to force the Labour Government to repudiate the imperialist Potsdam agreement, break with the capitalist international politics, withdraw the troops from Europe and allow the German and European workers to settle accounts with their own oppressors. The feeling of the dockers and stevedores at the moment is one of frustration and bitterness. For weeks decides to disband ! the union officials had tried to get the ity of the management. He speaks men back to work. Each time their strike-breaking policy was mouthed they were howled down. But after more than two months of struggle the very committee which was formed to replace the reactionary strikebreaking Union leadership, the Progressive Committee, supported the plausible back-to-work formula of This is 'the real meaning and the Barratt, the Stalinist General Secre-But tary of the Stevedores' Union.

> The real nature of this back-towork agreement is already making itself clear. The employers have suspended more than 1,500 men for refusing to work piece-work during the dispute. Though the suspensions have been lifted in the East India dock, the main body of the men will be forced to take their suspensions. The dock workers ask: If we had defeated the bosses is it possible that they would dare provoke us with these vicious acts ? It is clear to them that the return to work on the bosses' conditions was a victory for the bosses.

had fulfilled its purpose. From this, one is entitled to ask: was it the purpose of the Progressive Committee to get the men back to work, that is, break the struggle? This is clearly what it amounts to. Instead of using the 28 days to thoroughly organise and prepare for struggle, which is what a truly Militant Committee would have done, the Progressive Committee

The reaction of the dock workers to this act, which is either a product of a naive faith in the Donovans or of underhanded Stalinist work, is one of disgust and amazement. A number of members of the Progressive Committee and outstanding dock leaders expressed their opposition to this policy and intention to organise rankand-file committees. All serious militants will strive to organise such militant rank-and-file committees.

Never have workers shown such militancy as the London dock workers. Everything was there-national support, solidarity with other ports. Only militant leadership based upon a clear understanding was needed. The responsibility for the present situation must rest where it belongs: firstly, on the shoulders of the Donovans and Barratts, and secondly, on the Pro-gressive Committee, which, through its lack of organisation and hesitancy

left the dock workers leaderless. The Progressive Committee has done some good work, but all this has been destroyed by its most recent act. The main lesson of the London struggle the national contact, and prepare for the
